Team Assessment Report

How We Worked as a Team

For this final course project, our team, composed of Alden, Reyhan, and Johvonne worked efficiently together to deliver our website and its design. With consistent meetings, clear communication, and even designation of the tasks, we were successful in delivering the requirements of the project.

Communication and Meetings

Our team communicated through online messaging apps on a consistent basis. For the laboratory work, a meeting was held over the phone on a bi-weekly basis, for about 3 hours. During the meetings, we would go over the expectations for the lab, as well as personal deadlines for certain tasks. All group members were available to work during the meeting times.

Assignment of Tasks

In terms of the coding:

For the front-end aspects of the site, Johvonne Keane contributed the most. For back-end aspects, such as the web scraper, Alden O'Cain was responsible and delivered. For the search feature, Reyhan Kogukoglu contributed to deliver this.

For the diagrams and lab work:

All tasks were divided equally among the three team members.

Group Member	Student ID	Contribution
Reyhan Kogukoglu	100779413	100%
Alden O'Cain	100558559	100%
Johvonne Keane	100784273	100%
